OPEN INDEX >

I TURN CULTURAL INSIGHTS INTO IDEAS WORTH TALKING ABOUT.

01 / STRATEGY IN MOTION

Creative Marketing Strategist & Brand Storyteller

I turn cultural insights into ideas worth talking about. I start with people's habits, use what I learn to make strategic choices, and stay close to execution and measurement.

I start with people.

I turn cultural insights into ideas worth talking about.

I like the part before the brief gets tidy. What do people do when a brand isn't in the room? Which habits are hard to change? The answers usually turn up in a conversation, a comment thread, or an afternoon spent watching how a place works.

I use those observations to decide who we're talking to, what we can credibly say, and where the idea should show up. Then I stay close to the work. If we can't agree on what success looks like before launch, we'll have a harder time learning from it afterwards.

I'm drawn to teams working across culture, product and community, especially when the audience already has a language of its own.

FIG. 01 / ADRIAN KADE

FICTIONAL PROFILE

PERSONAL FILE / 01

Strategy in practice.

Adrian Kade is a 27-year-old creative marketing strategist and brand storyteller based in Jakarta, Indonesia, with 5+ years across positioning, campaigns and content.

01 / LISTEN

Culture first.

Use audience interviews, comment threads and observations to understand how people already behave.

02 / TRANSLATE

Make choices.

Turn those findings into audience priorities, positioning, channel plans and briefs collaborators can use.

03 / EVALUATE

Read the work.

Agree on what success looks like before launch. Use the results to decide what to refine next.

Selected work.

After Hours.

Give a utilitarian streetwear label a reason to belong in Jakarta after dark.

CLIENT / DEMO

Niteform Supply

ADRIAN'S ROLE

Campaign Strategist

INDUSTRY / PERIOD

Urban lifestyle / fashion / 2025 / 6 weeks

SCOPE

Audience research, positioning, creator strategy, tagged reporting

FIG. 01 / CAMPAIGN KEY VISUAL

The brief.

Give a utilitarian streetwear label a reason to belong in Jakarta after dark.

S / SITUATION

The challenge.

Niteform Supply made durable everyday jackets. Customers aged 19-25 in Jakarta remembered the pockets and weatherproofing, but rarely named the brand when asked what they would wear to a skate session or an independent gig. With a small capsule arriving before the rainy season, the label needed a recognizable role in those settings before it spent on distribution.

T / TASK

My mission.

I owned research, positioning, the creative brief and creator plan for a six-week campaign. With one shoot night and no celebrity budget, I set a target of 900 qualified lookbook visits in 28 days. A qualified visit meant reaching the capsule details section. Our producer owned the shoot, and the community partner ran the event.

ADRIAN'S ROLE

Campaign Strategist

WORKSTREAMS

Audience research, positioning, creator strategy, tagged reporting

A / ACTION / 01 OF 02

The work behind the work.

PHASE 01

Listen where the audience already gathers

I interviewed eight people recruited through skate crews and independent venues. I asked them to walk me through their last evening out, from packing to getting home, and compared those accounts with comments on 36 posts from the label and three competing labels. I coded comments for practical questions, style references and evidence of real use. The recurring tension was simple: people wanted gear that could handle a whole night without making them look dressed for a hike. The interviews were directional, so I used them to choose a concept to try.

OUTPUT / FIELD NOTES / TENSION MAP

PHASE 02

Give the product a job in the story

I framed the capsule as a uniform for people who make the city after dark. I separated the audience into scene regulars, who could lend credibility, and curious observers, who needed an easy first step. The first group got a real role in the launch. The second saw short route stories that linked directly to the lookbook. I specified tagged links by creator and channel so we could tell which stories led to capsule details.

OUTPUT / POSITIONING SHEET / CHANNEL MAP

STRATEGIC DECISION / DEMO

A uniform after dark.

The positioning gave weather-ready clothes a role in an actual night out. Scene regulars shaped the launch. Route stories gave curious observers a way into the lookbook.

RESEARCH INPUTS

Eight interviews through skate crews and venues, plus comment review on 36 posts.

A / ACTION / 02 OF 02

The work behind the work.

PHASE 03

Write a brief that leaves room for the crew

I wrote “The city has a second shift” and built a three-beat brief: first stop, weather or movement, last stop. I required one visible garment detail per edit and let each creator choose their own route and language. I scored potential partners on local audience fit, sustained comment quality and production reliability. Three were hired on flat fees with clear paid-usage windows and disclosure requirements.

OUTPUT / CREATOR BRIEF / THREE-FRAME SOCIAL MOCKUP

PHASE 04

Keep the edit tied to a decision

I ran the shot-list review and coordinated route approvals with the producer. After launch I compared seven-day lookbook visit quality by opening shot. The route-first edits sent a larger share of visitors to the capsule details than packshots did. With small samples and unequal delivery, I treated that as a distribution signal and moved the remaining placements to the route-first edits. The editor delivered the final cuts.

OUTPUT / EDIT REVIEW / TAGGED TRAFFIC READOUT

The city has a second shift.

Campaign key visual paired with Adrian’s three-beat route concept. The brief shows where the garment enters the story.

WORKING DOCUMENT / FICTIONAL EXCERPT

Creator brief · edit sequence

FRAME	VIEWER SEES	JOB
01 / Hook	A wet curb. Where are we going?	Recognize the city
02 / Proof	A skater stashes a phone in the rain	See the garment at work
03 / Action	Last stop, then a capsule link	Explore the lookbook

R / RESULT / FICTIONAL DEMONSTRATION METRICS

The impact.

1,124

QUALIFIED VISITS

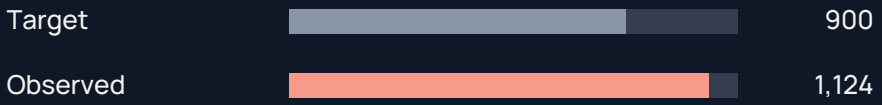

Lookbook sessions reaching capsule details within 28 days. Team target was 900.

2,810

TAGGED SESSIONS

All lookbook sessions from tagged campaign links over those 28 days. About 40% reached capsule details.

SNAPSHOT / QUALIFIED LOOKBOOK VISITS

TEAM OUTCOME / MEASUREMENT CONTEXT

The team cleared its traffic target without a second shoot. Tagged traffic captures the campaign paths we instrumented, while event word of mouth and untagged shares sit outside that total.

WHAT I'D TAKE FORWARD

I would reserve equal early delivery for each hook. The creative signal was useful, and a cleaner comparison would make the next editing decision easier.

Good Energy Club.

Turn an unfamiliar lime drink into a low-pressure first try after the game.

CLIENT / DEMO

Good Energy Club

ADRIAN'S ROLE

Integrated Marketing Lead

INDUSTRY / PERIOD

Functional beverages / FMCG / 2025 / 8 weeks

SCOPE

Launch strategy, sampling activation, channel coordination

FIG. 01 / CAMPAIGN KEY VISUAL

The brief.

Turn an unfamiliar lime drink into a low-pressure first try after the game.

S / SITUATION

The challenge.

Good Energy Club planned a lime electrolyte drink for active 18-30-year-olds. Small-store shelves already offered cheaper familiar drinks, and a new brand with no national distribution could waste a launch on people unable to buy it. The initial stock was limited to six stores near community courts in South Jakarta.

T / TASK

My mission.

I owned the eight-week launch plan, segment choice, creative and creator briefs, activation journey and measurement plan. The field team staffed events and retail partners controlled checkout. We aimed for 1,200 first samples and 12% tracked purchase redemption among people who received a unique offer code.

ADRIAN'S ROLE

Integrated Marketing Lead

WORKSTREAMS

Launch strategy, sampling activation, channel coordination

A / ACTION / 01 OF 02

The work behind the work.

PHASE 01

Find the occasion, then define the audience

I visited six stores at two times of day, photographed shelf adjacencies and recorded prices and claims. I ran 18 short intercepts at two community courts, asking people what they actually bought after play and where they bought it. Casual doubles groups described the walk home as the natural buying window. Competitive players already carried their preferred drinks. I prioritized the casual groups and treated the intercepts as a hypothesis for the pilot.

OUTPUT / SHELF AUDIT / OCCASION SEGMENTATION

PHASE 02

Make each channel do one job

I wrote a plan in which local club hosts invited people to the pop-up, sampling introduced the flavor, and a map pointed to the nearest store with stock. I chose hosts using past event turnout and proximity to retail, then set a review rule for stock and price before every post. I wrote the message around cold lime flavor and the post-game ritual. Product and legal teams reviewed the packaging language.

OUTPUT / CHANNEL JOURNEY / HOST SELECTION SCORECARD

STRATEGIC DECISION / DEMO

Own the walk home.

Casual doubles groups already bought drinks on the way home. Adrian built a path from the court to a nearby store with stock.

RESEARCH INPUTS

Six stores audited at two times of day and 18 intercepts at two courts.

A / ACTION / 02 OF 02

The work behind the work.

PHASE 03

Design the handoff from court to store

I built the station script, sign copy and unique-code flow. Anyone could take a sample without joining a list. Interested visitors could take one serialized card, which checkout staff collected at purchase. I rehearsed the handoff with staff and wrote a fallback tally sheet for poor reception. The designer delivered the can and counter mockups, while the event lead handled permits and staffing.

OUTPUT / ACTIVATION RUN OF SHOW / SIGNAGE AND OFFER CARD

PHASE 04

Fix confusion at the first weekend

I reconciled store redemptions with issued cards and grouped questions from staff notes. People were scanning for a store map and assuming it was the offer itself. I separated the QR map from the physical code, then updated the signs and host scripts before the remaining weekends. The retail lead added a stock check before each scheduled session.

OUTPUT / DASHBOARD / SIGNAGE REVISION

Sampling-station visualization. Adrian designed the sequence from the club invite through sampling and the store offer.

WORKING DOCUMENT / FICTIONAL EXCERPT

Activation plan · court to checkout

TOUCHPOINT	MESSAGE	TRACKING
Club invite	Meet us after doubles	Host link
Sampling counter	Try it cold	First-sample tally
Neighborhood store	Bring this numbered card	Single-use redemption

R / RESULT / FICTIONAL DEMONSTRATION METRICS

The impact.

1,360

FIRST SAMPLES

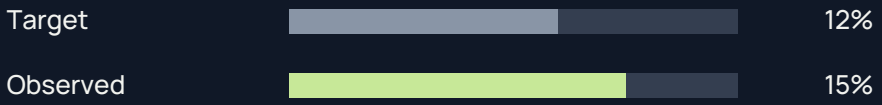

Staff tallies across four weekends. Return pours were recorded separately.

15%

OFFER REDEMPTION

129 unique codes redeemed out of 860 issued. Measured through 14 days after the last event.

SNAPSHOT / UNIQUE OFFER REDEMPTION

TEAM OUTCOME / MEASUREMENT CONTEXT

The team exceeded both targets. Offer redemption reflects people who accepted a card. It does not estimate purchase conversion for everyone who tried the drink.

WHAT I'D TAKE FORWARD

I would build a second purchase readout into the pilot. A one-off offer can show that the handoff worked, while return visits would help us assess whether the occasion stuck.

Scroll Culture.

Give a short-form entertainment channel formats people would stay to finish.

CLIENT / DEMO

Loopline Studio

ADRIAN'S ROLE

Social Media & Content Strategist

INDUSTRY / PERIOD

Entertainment / digital media / 2024 / 6 weeks

SCOPE

Content audit, format design, hook tests, editorial planning

FIG. 01 / CAMPAIGN KEY VISUAL

The brief.

Give a short-form entertainment channel formats people would stay to finish.

S / SITUATION

The challenge.

Loopline Studio posted entertainment explainers for Indonesian viewers aged 18-24. Topic spikes attracted views, but slow intros and a new format every week made it difficult for viewers to know what they were getting. The team also spent more editing time on each upload than its schedule could sustain.

T / TASK

My mission.

I owned an audit, a repeatable format system and the six-week test calendar. Two editors and one presenter produced three posts a week. I targeted a median completion rate of 30% on 20-30-second organic TikToks and tracked editing time as a guardrail.

ADRIAN'S ROLE

Social Media & Content Strategist

WORKSTREAMS

Content audit, format design, hook tests, editorial planning

A / ACTION / 01 OF 02

The work behind the work.

PHASE 01

Separate topic performance from format

I audited 60 organic uploads, tagging length, opening device, time to payoff and caption type. I compared retention within the 20-30-second range and used comments to identify unanswered questions. I also reviewed 24 posts from three peer channels for format ideas using only publicly visible signals. The clearest drop-offs appeared before the first concrete example, especially when a branded title card opened the clip.

OUTPUT / AUDIT SHEET / RETENTION ANNOTATIONS

PHASE 02

Give editors repeatable formats

I built three pillars from the audit: an explained clip, a two-sided debate and a recommendation worth saving. I wrote an editorial calendar that rotated those formats by weekday, with topic, evidence to verify, opening line and handoff deadline on each row. I scoped the formats around a reusable caption style and a single presenter setup so the team could produce within its existing hours.

OUTPUT / CONTENT MATRIX / CALENDAR

STRATEGIC DECISION / DEMO

Show the payoff first.

The first concrete example arrived too late in many clips. A repeatable format made the first visual proof part of each brief.

RESEARCH INPUTS

60 organic uploads tagged by format and compared on retention, plus 24 peer-channel posts.

A / ACTION / 02 OF 02

The work behind the work.

PHASE 03

Put the opener under test

I briefed nine matched topic pairs across the test window, alternating a question-led opener with a result-first opener. I kept runtime, production setup and weekday slots comparable where possible. Each brief had a spoken line, an opening frame and the first visual proof. The presenter rewrote lines that sounded unnatural on camera and the editors owned rhythm and finishing.

OUTPUT / HOOK CARDS / SHORT-FORM STORYBOARD

PHASE 04

Read results at a consistent age

I logged each post after seven days and compared medians to reduce the influence of breakout posts. Result-first openings won six of nine directional pairs on completion. Distribution was organic, so audiences and timing could still explain some of the difference. I made result-first the default for explainers, kept the question opener for debate posts and replaced one labor-intensive format after reviewing edit logs.

OUTPUT / SEVEN-DAY PERFORMANCE COMPARISON

Start with the good bit.

Campaign visual paired with the production matrix that connected each format's first frame to its payoff.

WORKING DOCUMENT / FICTIONAL EXCERPT

Format matrix · production handoff

FORMAT	OPENING BEAT	PAYOFF
The cut	Play the moment first	Explain what changed
Two sides	Put the disagreement on screen	Let each side make its case
Save this	Lead with the recommendation	Show who it suits

R / RESULT / FICTIONAL DEMONSTRATION METRICS

The impact.

34%

MEDIAN COMPLETION

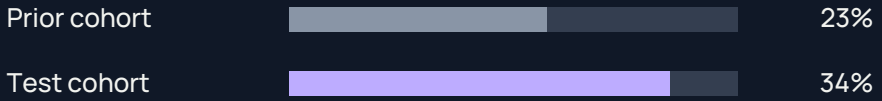

18 organic videos of 20-30 seconds, measured seven days after each post. The 18 comparable preceding videos had a 23% median.

75 min

MEDIAN EDIT TIME

Per test post, from editor logs. The preceding comparable posts took 110 minutes at the median.

SNAPSHOT / MEDIAN VIDEO COMPLETION

TEAM OUTCOME / MEASUREMENT CONTEXT

The publishing team exceeded the 30% completion target while reducing editing time. The cohort comparison includes topic and distribution differences and supports an editorial decision rather than a causal estimate.

WHAT I'D TAKE FORWARD

I would write a minimum evidence rule before the next test. A high-completion hook earns the slot only if the clip delivers what the opener promises.

Human Signal.

Explain a workflow product in terms a clinic manager could repeat to a colleague.

CLIENT / DEMO

Human Signal Systems

ADRIAN’S ROLE

Brand Strategy Consultant

INDUSTRY / PERIOD

Technology / 2026 / 4 weeks

SCOPE

Discovery, positioning, messaging, concept validation

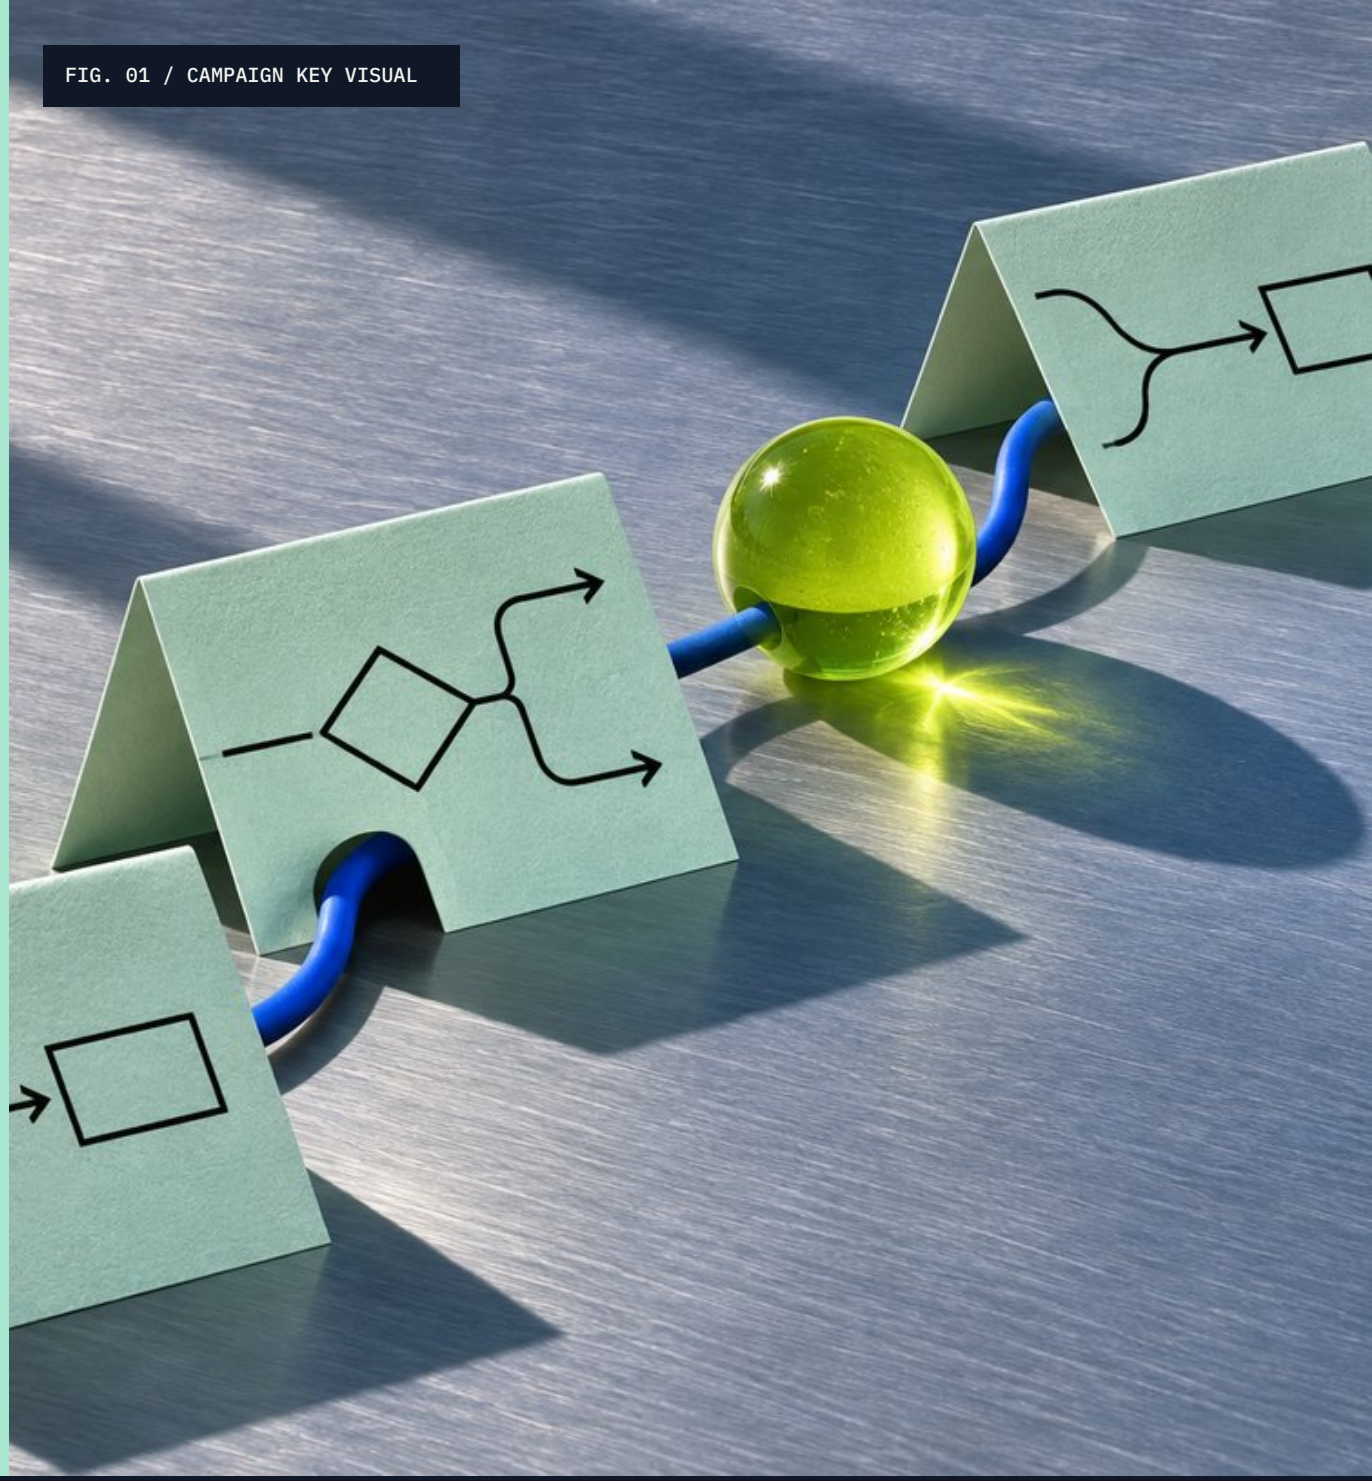

FIG. 01 / CAMPAIGN KEY VISUAL

The brief.

Explain a workflow product in terms a clinic manager could repeat to a colleague.

S / SITUATION

The challenge.

Human Signal Systems sold handoff software to small clinic administration teams. Prospects read “an orchestration layer” and often assumed it replaced their scheduling platform. The product actually assigned follow-ups, showed their status and worked alongside existing tools. The misunderstanding was costing the small sales team time in introductory calls.

T / TASK

My mission.

I owned discovery, positioning, the messaging guide and a four-week concept validation sprint. The product lead signed off on claims and the designer mocked up the landing page. We agreed on a directional criterion: at least eight of 12 test participants should describe the product’s job unaided.

ADRIAN’S ROLE

Brand Strategy Consultant

WORKSTREAMS

Discovery, positioning, messaging, concept validation

A / ACTION / 01 OF 02

The work behind the work.

PHASE 01

Collect the words people already use

I interviewed three founders and reviewed anonymized sales notes from 14 calls. With permission, I then spoke to ten clinic administrators about a recent follow-up that had slipped between shifts. I tagged their language by trigger, consequence and workaround. “Who has it next?” came up repeatedly. A review of five competitor homepages found similar platform language and few plain examples of handoffs.

OUTPUT / INTERVIEW SYNTHESIS / COMPETITOR CLAIM MAP

PHASE 02

Position around ownership at handoff

I compared three territories: fewer dropped tasks, easier coordination and a clear owner for each follow-up. I chose clear ownership because it matched a visible product behavior and avoided a claim about reducing clinical errors. I wrote a one-sentence proposition for the manager, three proof points and a short explanation of which workflows the product could support alongside scheduling.

OUTPUT / POSITIONING BOARD / CLAIM BOUNDARIES

STRATEGIC DECISION / DEMO

Make the owner clear.

Adrian positioned the product around who owns a follow-up. The promise matched a visible product behavior and gave prospects a concrete example.

RESEARCH INPUTS

Three founder interviews, sales notes from 14 calls, ten administrator interviews and five competitor homepages.

A / ACTION / 02 OF 02

The work behind the work.

PHASE 03

Build a concrete explanation

I wrote a hero line and a three-panel example about a missed callback: record the follow-up, assign an owner and see it close. The designer turned that sequence into a landing-page concept and the product lead checked that each panel matched the interface. I supplied approved terms, examples and prohibited claims so sales and marketing could use the same language.

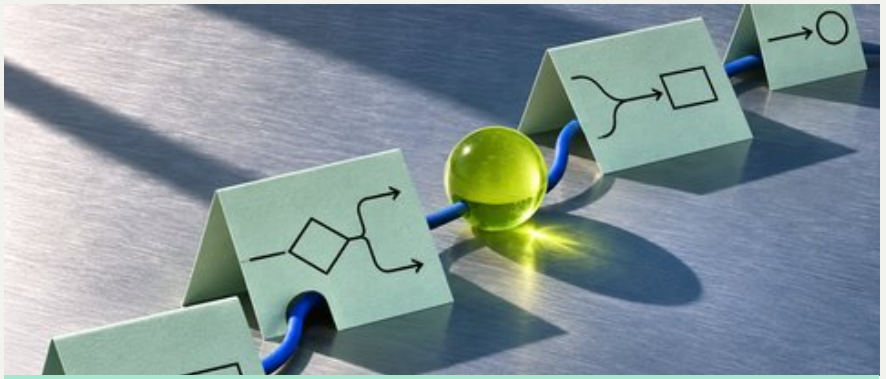

OUTPUT / MESSAGING DIAGRAM / HOMEPAGE CONCEPT

PHASE 04

Check what survives a ten-second glance

I recruited 24 administrators who had not taken part in discovery and assigned 12 to the existing concept and 12 to the new one. Each saw one screen for ten seconds and answered what it did and what it might replace. I counted a correct description when it mentioned both assigning and tracking follow-ups, then logged common misconceptions separately. I added the “works alongside your scheduler” line after several readers still assumed a replacement.

OUTPUT / CONCEPT READOUT / APPROVED COPY GUIDE

Campaign visual paired with the messaging guide’s promise, callback example and scheduling boundary.

WORKING DOCUMENT / FICTIONAL EXCERPT

Messaging hierarchy · manager audience

LEVEL	LANGUAGE	PROOF
Promise	See who has it next	An owner on every assigned follow-up
Example	Hand off a callback before you leave	Assign, check status, close
Boundary	Keep your scheduler	Works beside existing scheduling tools

R / RESULT / FICTIONAL DEMONSTRATION METRICS

The impact.

9 / 12

NEW CONCEPT

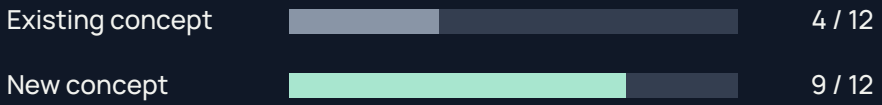

Participants describing both assigning and tracking follow-ups after a ten-second exposure.

4 / 12

EXISTING CONCEPT

Separate group under the same prompt and exposure. Small sample for directional concept feedback.

SNAPSHOT / UNAIDED PRODUCT COMPREHENSION

TEAM OUTCOME / MEASUREMENT CONTEXT

The new concept met the sprint criterion. The team adopted the guide for its site and sales materials. The concept test measured comprehension in the session, with commercial outcomes outside its scope.

WHAT I'D TAKE FORWARD

I would test the copy in a live inquiry flow next. I want to see whether clearer first impressions translate into better-qualified conversations.

In the making.

5+ years learning how ideas get from a research note to something people can see, try or share.
Fictional career history.
